

dashboard-desktop-early.png

CURRENT player panel (desktop, early game). PROBLEM: at the very first space the panel already stacks space story + NPC narration + 'Hire Expeditor' + four action buttons (Hire 3 Expeditors / Get Work Packages / Lock the scope / Push back) -> the 'a LOT of systems at once' overwhelm players report. GOOD: clear left-panel/board separation and a green 'next action' affordance.

DESIGN EXPLORATION: 'Story-as-Composed-Stories' layout options - three layouts for the landing-on-space modal (stacked cards / tabs / collapsible) + per-action modal placements. Directly relevant prior art for presenting story + actions without overwhelm.

Story-as-Composed-Stories — Layout Options

Proposal: a space's "story" is composed of per-action narratives. Each action's narrative is also reused inside that action's modal as flavor text — single source of truth, no duplication. Action order recommended: **E** (Expeditor — push usage) → **W** (Work — scope) → **B** (Bank — money in) → **I** (Investor — money in) → **L** (Life — usually auto, rarely shown).

Source of truth (Spaces.csv per-action narrative columns)

These columns already exist. Today only 'Event' is shown to the player; per-action narratives are dormant.

```
space_name = ARCH-FEE-REVIEW  visit_type = First
e_card_narrative = "You hear horror stories about reviews dragging on. An expeditor could grease the wheels."
w_card_narrative = "The architect hands you a stack of revised drawings — your scope just grew."
b_card_narrative = "The architect's invoice lands on your desk. Time to write a check."
i_card_narrative = "Your investor calls — they want to see the latest plans before the next disbursement."
l_card_narrative = "" (empty — not every space has a Life event)
```

1. Landing-on-space modal — three layouts

Player just landed on ARCH-FEE-REVIEW. The space has 4 actions (E, W, B, I). How do we present the composite story?

OPTION A

Stacked Action Cards

Each action is a colored card showing its narrative + button. Player scrolls top-to-bottom in recommended order.

Architect Fee Review

DESIGN PHASE • FIRST VISIT

EXPEDITOR

Hire an expeditor (1 E card)

You hear horror stories about reviews dragging on. An expeditor could grease the wheels.

Optional - Saves time later

Draw E

WORK

Architect adds scope (1 W card)

The architect hands you a stack of revised drawings — your scope just grew.

Required

Draw W

BANK

Pay architect fee (1 B card)

The architect's invoice lands on your desk. Time to write a check.

Required

Draw B

INVESTOR

Investor check-in (1 I card)

Your investor calls — they want to see the latest plans before the next disbursement.

Optional

Draw I

Negotiate

End Turn

+ Story + mechanics in one view, scannable

+ Color-coded edges teach card types over time

- Tall modal on small screens; a lot to scroll

OPTION B

Action Tabs

Tabs across top, one per action. Active tab shows that action's narrative + button. Compact.

Architect Fee Review

DESIGN PHASE • FIRST VISIT

E

W

B

I

EXPEDITOR

Hire an expeditor

You hear horror stories about reviews dragging on. An expeditor could grease the wheels.

Optional - Saves time later

Draw E (1)

Step 1 of 4 actions on this space.

Negotiate

End Turn

+ Compact — works on phone

+ Player consciously moves through each action

- Hides parallel choices behind tabs (less scannable)

- Easy to "End Turn" without seeing all narratives

OPTION C

Collapsible List

Action list collapsed by default. Click to expand the narrative + button. The first action auto-expands.

Architect Fee Review

DESIGN PHASE • FIRST VISIT

E

Hire an expeditor

You hear horror stories about reviews dragging on. An expeditor could grease the wheels.

Architect adds scope

Required

B

Pay architect fee

Required

I

Investor check-in

Optional

Negotiate

End Turn

+ Compact by default, expands on demand

+ Shows full action list at a glance

- Narrative is hidden until clicked (player may skip)

2. Per-action modal — three flavor placements

Player clicked "Draw W" on ARCH-FEE-REVIEW. Confirmation modal appears. Where does the per-action narrative live inside it?

OPTION A

Tinted Blockquote on Top

Narrative sits in a colored card at the top of the modal. Mechanics below.

Draw 1 Work card

ARCH-FEE-REVIEW • W CARD

The architect hands you a stack of revised drawings — your scope just grew.

Effect+1 W card

Estimated work3–8 days

Hand size after4 cards

Cancel

Draw

+ Strong visual — narrative reads like a quote

+ Color signals card type immediately

- Adds vertical height

OPTION B

Italic Lead-in Line

Narrative is a single italic line under the title, separated from mechanics by a dashed divider.

Draw 1 Work card

ARCH-FEE-REVIEW • W CARD

The architect hands you a stack of revised drawings — your scope just grew.

Effect+1 W card

Estimated work3–8 days

Hand size after4 cards

Cancel

Draw

+ Minimal — narrative + mechanics fit small modals

+ Works for very short narratives

- Less visually distinct; reads like a subtitle

OPTION C

Two-Panel: Story | Mechanics

Flavor on the left, mechanics on the right. Strongest separation of "why" vs "what".

Draw 1 Work card

ARCH-FEE-REVIEW • W CARD

The architect hands you a stack of revised drawings — your scope just grew.

Effect+1 W

Work3–8 days

Hand4

Cancel

Draw

+ Clear conceptual split — story on left, rules on right

+ Wider modal feels "premium"

- Cramped on phone (would need to stack vertically)

- Narrative competes with mechanics for attention

What I'd recommend (and why)

Landing-on-space: Option A — Stacked Action Cards. The composite-story idea is the whole point: showing all narratives at once is the feature. Tabs/accordion hide the very thing we're trying to surface. Yes, it's tall — but spaces typically have 2–4 actions, not 10.

Per-action modal: Option A — Tinted Blockquote. Same color token as the action card on the landing modal → the player sees the same narrative in the same color, building a "this is the story for this card type" mental model. Option B is too quiet; Option C is too noisy.

Drop the standalone 'story' field? Yes. Spaces.csv keeps 'Event' as a vestigial header (or we remove it). The composed view IS the story. One source per action, used in two places.

Open questions for you

- Do you want a single-line "opening header" above the composed actions (a one-sentence framing)? Or just title + actions?
- For Life cards that are auto-resolved, should we still show the L narrative on landing (read-only), or hide it entirely when no player action is required?
- For Required vs Optional actions — is the meta label enough, or do we want a stronger visual treatment (e.g., a red ring on Required-but-not-yet-done)?

IF NO —

Q5 — "Did DOB approve your plans?"

Q5

Did DOB approve your plans?

IF YES —

→ PM-DECISION-CHECK

IF NO —

→ REG-DOB-TYPE-SELECT

+ Add another question

Q1 Did you pass FDNY before?

└ YES → Q2 Did the scope change since last visit?

└ YES → REG-FDNY-PLAN-EXAM

└ NO → Q3

└ NO → Q3 Did DOB send you here?

└ YES → REG-FDNY-PLAN-EXAM

└ NO → Q4 Do you have sprinklers/standpipe/...?

└ YES → REG-FDNY-PLAN-EXAM

└ NO → Q5 Did DOB approve your plans?

└ YES → PM-DECISION-CHECK

└ NO → REG-DOB-TYPE-SELECT

Every branch must eventually land on a space — the validator flags any Q that can loop back into the chain without an exit. On the Flow map, logic spaces draw a red dashed edge to every reachable destination with a "rule-driven" label.

Dice Outcomes (side effects)

Logic spaces usually skip dice — rolls only fire on dice-based spaces.

[disabled because movement type is Logic]

PLAYER PREVIEW — YES/NO MODAL CHAIN

DECISION REQUIRED

Sara at REG-FDNY-FEE-REVIEW

Did you pass FDNY before?

YES

NO

Step 1 of up to 5
