

modal-card-play.png

CARD PLAY MODAL (CardModal). Appears when a player taps a card to play it. Shows card name + type badge, description, Cost, Phase Restriction, Effects, and Activate Effect / View Back / Close. GOOD: clear structure, dictionary-linked terms. PROBLEM: heavy chrome for a simple action; 'Effects When Activated: Apply Card' is opaque.

modal-path-choice.png

PATH CHOICE is NOT a modal -> it renders INLINE in the player panel as 'CHOOSE YOUR DESTINATION' (two path buttons + a greyed 'Lock in the path' until other actions are done). Key for the designer: movement decisions compete for the same no-scroll panel space as everything else, rather than getting a focused overlay.

DOB Examiner

I'm picking my filing path. Plan Exam is slow but safe. Prof Cert is fast but risky. The owner wants this done — so do I. The call's mine.

PM Action

Plan Exam is slower but safer. Prof Cert is faster but riskier. Pick.

Outcome

Path chosen. I live with it.

LEDGER

CHOOSE YOUR DESTINATION

Standard Plan Examination — the city reviews your plans

Professional Certification — self-certify (faster, but you own the risk)

modal-logic-question.png

LOGIC-QUESTION / APPROVAL-ROUTING MODAL (ChoiceModal, centered overlay). Appears during regulatory routing (e.g. the FDNY chain): 'Question 5 of 5', NPC attribution (FDNY Inspector), Yes/No, + a hint. This is the closest thing to an 'approval result' modal -> there is NO separate 'approval granted!' modal; approval is communicated via this routing Q&A + the DOB/FDNY badges in the panel + the dice-result at the examiner space.

The screenshot displays a game interface with a modal question overlay. The top bar shows 'PROGRESS #6374' and 'Connected'. The main area is divided into stages: SETUP, OWNER, FUNDING, DESIGN, REGULATORY, CONSTRUCTION, and END. A progress bar indicates 71% completion in the REGULATORY stage. A player's progress is shown with various metrics like '71% done', '\$2M/\$3.8M', '7.5%/20%', and '124d / 440d est.'. The modal question, 'Question 5 of 5', is attributed to 'FDNY Inspector — Regulatory' and asks 'Player 1: Do you already have DOB approval for these plans?'. It features 'Yes' and 'No' buttons and a hint: 'The clerk needs an answer before routing your application.' The background shows a game board with various spaces like 'Audit', 'Initiation', 'Fee Review', 'Inspect', 'Final Review', 'Plan Exam', 'Prof Curt', 'Type Select', and 'Fee Review'. A sidebar on the left contains player information, a ledger, and action buttons like 'EXPEDITOR READY TO HELP' and 'Determine Time Impact'.

I read for what kills people in fires. Sprinkler heads, standpipe risers, egress widths, alarm zones. Sound like you know the code if you want — I actually know it. Objections come back specific.

PM Action: Accept FDNY's verdict, or push back on objections.

Outcome: FDNY verdict in.

Question 5 of 5

FDNY Inspector — Regulatory

Player 1: Do you already have DOB approval for these plans?

Yes

No

The clerk needs an answer before routing your application.

modal-dice-result.png

DICE RESULT MODAL (DiceResultModal). After a dice action/roll. NPC summary + Effects Applied + a Before->After resource table (scope, work packages) + Continue. GOOD: the Before->After comparison is genuinely useful and worth keeping. This same modal carries the approval outcome when rolling at a DOB/FDNY examiner space.

The screenshot shows a game interface with a modal titled "The owner walks you through it". The modal contains the following content:

- Result: 1**
- The Owner — Initiation**
- Summary:**
Sit down. I've been turning this project over for months — let me walk you through what I want built. You're going to hear it from me first, before anyone else gets a say.
- Effects Applied:**
 - Took on a Work Package
 - Construction of disaster-resistant community center
- Before — After**

Project scope	\$3,800,000	→	\$7,600,000	+ \$3,800,000
Work Packages	1 Work Package	→	2 Work Packages	+1
- Continue** button

The background interface shows a progress bar with stages: SETUP, OWNER, FUNDING, DESIGN, REGULATORY, CONSTRUCTION, and END. The current stage is REGULATORY, with a goal of "Complete construction and reach the FINISH space". The progress is 71%.

Player 1 is shown with a "Scope Initiation" action. The player's resources are: 71% done, \$2M/\$7.6M, 3.5%/20%, and 12Ad / 440d est.

The player's actions are: Hire Expeditor, Overtime, and Hire 3 Expeditors.

The modal also shows a "Result: 1" and a "Continue" button.

modal-endgame.png

END-GAME MODAL (EndGameModal). On reaching FINISH. Project Summary (scope, days, turns, rounds, score, work cards), Fees Paid breakdown, Funding Sources, plus a scrollable 'project debrief' (insights) below + Play Again. NOTE: it scrolls; 'Total spent \$0' shown here is an injected-scenario artifact (Fees Paid correctly show \$480k).

Game Complete!

Congratulations Player 1!

You have successfully reached an ending space and won the game!
